Monleras International Labor Camp has been running for some fifteen years and its operation has been very satisfactory. Young volunteers from many countries in Europe and some countries in Asia (Turkey, Korea ...) and in America (Canada, Mexico ...), as well as young people from all the autonomous communities of Spain, have come from this field. In recent years the main activity has focused on the so-called "Game Territory", a space in a natural environment conditioned for the development of educational and leisure activities. In successive years the volunteers have designed attractive playgrounds and have built several facilities with traditional and bio-construction techniques, such as the straw bale cabin, the bread oven, the dry toilet, a traditional hut, etc.
